1.4 WORKS

Each SQC consultancy package consists of No. of Roads and Bridges being executed by different contractors under the overall supervision and control of concerned General Manager In-charge PIU. SQC consultant is to supervise the construction of all works included in the consultancy package under the direct control of GM, PIU concerned.

1.5 Keeping in view the duration of construction, it is expected that more concerted efforts will be required either at one front by deploying adequate machinery and manpower including more number of shifts etc. or alternatively by opening more than one frontage simultaneously in order to complete the construction projects within the stipulated periods. These details are furnished to acquaint the prospective supervision consultants as they are expected to reflect the above requirement in their technical and financial proposal adequately besides dealing the project management aspect in their proposed methodology.

1.6 DPRs of works have been prepared by independent consultants under the overall supervision of GM, PIU. However, during construction certain changes in drawing/design may become necessary which will have to be attended by the SQC consultant.

2. Objective

The objectives of the proposed Consultancy Services are :

- i. Proper management of civil works contract as 'Engineer' in terms of civil works contract including field measurements and quality assurance work.
- ii. Comprehensive supervision of project implementation activities carried out by the Contractors to ensure complete compliance with the drawings, technical specifications and various stipulations contained in the Contract Documents.
- iii. Efficient construction supervision by personnel who are experienced in the modern methods of construction supervision and contract management.
- iv. Ensure high standards of quality assurance in the supervision/execution of work.
- v. Completion of the work within the stipulated period of completion. Consultants will specially be responsible for quality and timely completion.

3. Contract Management Framework (CMF)

The main features of Contract Management Framework (CMF) formulated for the execution of the proposed construction of works are: -

- i. For administration of the Contract under the Project, the MPRRDA will be the Employer. The Employer has a Project Implementation Unit (PIU), which is the in-charge for the works. The PIU is headed by the Project General Manager who is assisted by appropriate professional and support staff. The Project General Manager will act for and on behalf of the Employer.
- ii. The Team leader shall be responsible for overall coordination and supervision. The Team leader shall have a team of experienced professional and support staff for the execution of the Consultancy Service under the Contract.
- iii. The Consultant will make the necessary measurements and ensure the quality of works. The Consultant shall make all engineering decisions required during the implementation of the Contract. However, **the Consultant shall seek prior approval of the Employer with regard to the following:**
 - a. Any variations or deviations with financial implications.
 - b. Variation in work quantities for fixation of rates.
 - c. Sanction of additional items, sums or costs and variations of rates and prices
 - d. Approve the subletting of any part of works.
 - e. Approve any extension of contract period.
 - f. Stopping and/or termination of the Contract for Works
 - g. Change in specification and deviation from approved drawing.

4. Scope of Consulting Services

The Scope of Consulting Services shall include but not necessarily be limited to the following:

4.1 Engineering and Administration

1. Assist Employer in contract administration and management of the project.
2. Act as 'Engineer' for the purpose of civil works contract.
3. Interpretation of the Technical Specifications and Contract Document.
4. 5. Review the DPR and suggest modification; if considered necessary. Modification will be carried out by DPR consultant if his services are available otherwise this will be done by SQC consultant.
6. Initiate advance actions for handing over of site and/or issue of drawings, and / or advise Employer.
7. Scrutinize the Construction Methods proposed by the Contractor for carrying out the works to ensure that these are satisfactory with particular reference to the technical requirements, project implementation schedule and environmental aspects as well as safety of works, personnel and the general public.
8. Scrutinize the detailed drawings, safety measures, protection works, arboriculture etc. and prepare the corrected drawing (if required) and issue it to the contractor within seven days of receipts of drawing from GM PIU.
9. Survey on proposed and alternate (if required) alignment and approve final layout given by the contractors' Engineers.
10. Assessment of material required and their supply schedule.
11. Finalize foundation level of CDs/ Bridges in consultation with GM.
12. Approve shuttering and reinforcement before concreting.
13. Approve the working drawings/detailed drawings prepared by DPR consultant or any other agency and also setting out data and issue the same to the contractor within 3 days after getting the required approval of GM PIU.
14. Prepare working drawings wherever necessary for both permanent and temporary works.
15. Prepare, scrutinize and approve the drawings for temporary works as required under the Contract.
16. Liaisoning and co-ordination with the local authorities for shifting of utilities wherever required.
17. Review and ensure conformity of Contractor's securities in approved formats.
18. Maintain a day-to-day diary recording all events relevant to the works.

4.2 Construction Supervision

1. Carry out detailed checking and verification of the setting-out data and layout to ensure conformity with the working drawings.
2. Carry out regular inspection of the Contractor's equipment, plant, machinery, installations, housing and medical and other mandatory facilities etc. and ensure that they are adequate and are in accordance with the terms and conditions of the contract.
3. Direct the Contractor to carry out all such works or to do all such things as may be necessary to avoid or to reduce the risk in case of any emergency affecting the safety of life or of the works or of the adjoining property and advise the Employer as soon as is reasonably practicable.
4. Supervise the Contract in all matters concerning safety and care of the work including environmental aspects and labour welfare.
5. Inspect the Works on substantial Completion before taking over and indicate to the G.M.P.I.U. any outstanding work to be carried out by the Contractor during the Defect Liability period.
6. Supervise Geotech investigation wherever required.
7. Maintain daily material consumption register on each work site.
8. Temporary diversion of traffic and water course, wherever required.

4.3 Quality of Materials and Works

1. Evolve and implement a system for the quality assurance of the works. The system of control of quality of materials and completed works shall also include sampling methods and acceptance criteria. The sampling methods and the acceptance criteria shall be based on statistical methods and the recommendations of the relevant IRC and MOST publications and international practices. The supervision consultant will get the RCC works laid in his presence and the samples for the same shall be collected as per norms. Any other aspects for proper quality control shall be finalized between the Consultant and the Employer.
2. Inspect the performance of works with regard to workmanship and compliance with the specifications, order/supervise/perform tests of materials and/or work and approved/disapprove the Contractor's plant and equipment.
3. AME under his supervision shall ensure (i) preparation and approval of design mix, if necessary, before starting of work (ii) ensure sampling of cubes/materials during execution of work (iii) testing of all material to be used on work.
4. Review and approve the test results/certificates of all construction material and/or sources of material and carry out additional tests as necessary to establish their quality.
5. Associate with the work tests being carried out by the contractor and undertake additional tests as necessary to assess the quality of works.
6. Carry out comprehensive technical supervision of the works to ensure their quality and conformity with the standards and specifications as per contract. In addition to assessing and checking the laboratory and field tests carried out by the Contractor, the Consultants shall carry out independent tests as necessary to establish their quality.
7. In the event of any material or item of work is found to be substandard and unacceptable, the Consultant shall initiate actions so that such cases do not recur. **During the inspection of the officers of the department or State quality monitors / National Quality Monitors if it is noticed that sub-standard work has been allowed (whether paid or not) by the consultant, five times of the consultancy fee payable to the consultant for that particular work will be recovered from him. However, consultant will not be discharged of his responsibility to get the defects rectified by the contractor.**
8. Maintain a permanent record of all measurements for the work quantities to be paid for and the results of all tests carried out for monitoring the quality of works.

4.4 Measurement and Payment

1. Take measurements of all items of works and of quantities of materials incorporated in the work and maintain up to date books containing such computations or other information concerning the use of construction materials, properly segregated in to sections of construction.
2. Maintain up to date records of remaining quantities to be incorporated in the work and monitor the expected project cost based upon the remaining quantities. General records of all labour and specified materials used in the works, including copies of orders, delivery notes and invoices for such materials and details of wage rates paid by the contractor shall be maintained.
3. Prepare a schedule for placing the orders for specified materials, in consultation with the contractor, to minimize the financial effects of escalation in the price of those materials.
4. Furnish certificate to the General Manager that the items included in the Contractor's bill are correct as regards quantity and satisfy the required quality of works and are acceptable with regards to the standards and specifications prescribed in the Contract and relevant codes.

5. Check and certify all requests for payments, all monthly bills, interim bills and final bill of the Contractor.
6. Following percentage checks / recording of measurement and quality control tests shall be exercised by the team members of the consultant before submission of the measurements/bills to General Manager PIU: -
 - (1) Measurement of all items of works will be recorded by Field Engineer in the Measurement Book as per provisions and rules.
 - (2) All measurement of hidden items of works will be checked by the Team Leader before the work is covered.
 - (3) Following percent checks of measurement shall be done by the team members of the consultant.

(i)	By Team Leader	10%
(ii)	By ARE	50%

These checks shall be exercised in respect of each work in the given percentage and should cover all important items/components of work. Checks of measurements have been laid down to facilitate regular working but consultant will be fully responsible for all measurements recorded or checked by his staff. Percentage check of measurements prescribed for TL is for other than those checked by ARE but this does not prohibit TL from checking the measurement of the part checked by ARE. However, this shall be in addition to the percentage prescribed for TL.
